

PLANT BREEDING

CONTENTS

Chapter	Pages
CHAPTER-1 : PLANT BREEDING	17-39
1.1: Introduction	17
1.2: Objectives of Plant Breeding	17
1.3: Historical Background of Plant Breeding	18
1.4: Indian Institutes Engaged in Plant Breeding for Crop Improvement	19
1.5: International Institutes Engaged in Plant Breeding for Crop Improvement	20
1.6: Breeding System or Modes of Reproduction in Plants	21
1.6.1: Vegetative Reproduction	21
1.6.2: Apomixis	26
1.6.3: Sexual Reproduction	27
1.7: Important Achievement of Plant Breeding	30
1.8: Undesirable consequences of Plant Breeding	32
1.9: Future Prospects of Plant Breeding	32
1.10: Branches of Plant Breeding	33
1.11: Eminent Plant Breeders and their Contribution	34
1.11.1. Some of the eminent Indian Plant Breeders and their contributions	34
Selected Questions	36
CHAPTER-2 : METHODS OF CROP IMPROVEMENT	40-75
2.1: Introduction	40
2.2: Centers of Origin	41
2.3: Domestication of Crop Plants	44
2.3.1. Crop Domestication and Loss of Genetic Diversity	45
2.3.2. Consequences of the Loss of Genetic Diversity	46
2.3.3. Efforts to Mitigate the Loss of Genetic Diversity	47
2.4: Plant Genetic Resources (PGR)	47
2.4.1. Germplasm Conservation	49
2.4.2. Importance of Germplasm	50
2.5: Plant Introduction and Acclimatization	51
2.6: Selection Method for Crop Improvement	56
2.6.1: Mass Selection	57
2.6.2: Pure Line Selection	59
2.6.3. Difference between mass selection and pure line selection	60
2.6.4: Clonal Selection	61

2.7: Hybridization	62
Selected Questions	70
CHAPTER-3 : QUANTITATIVE INHERITANCE	76-92
3.1: Quantitative inheritance	76
3.2: Mechanism of Quantitative Inheritance	77
3.3: Examples of Polygenic inheritance	78
3.3.1: Inheritance of Kernel colour in wheat	78
3.3.2: Skin colour in human beings	80
3.4: Difference between Monogenic and Polygenic Inheritance	81
3.5: Similarities between Monogenic or Oligogenic and Polygenic Inheritance	83
3.6: Analysis of Polygenic Traits	83
3.7: Significance of Polygenic Inheritance	83
3.8: Breeding for Quantitative Characters	84
3.8.1. Handling of quantitative data	87
3.8.2. Environmental effect on quantitative characters	87
3.8.3. Estimation of heritability and genetic advance	88
Selected Questions	90
CHAPTER-4 : INBREEDING DEPRESSION AND HETEROSIS	93-107
4.1: Inbreeding Depression	93
4.1.1: History	94
4.2: Heterosis	94
4.2.1: History of Heterosis	95
4.3: Genetic Basis of Inbreeding Depression	95
4.3.1: Effects of Inbreeding	97
4.3.2: Advantages of Inbreeding	97
4.4: Genetic Basis of Heterosis	98
4.4.1: Dominance hypothesis	98
4.4.2: Overdominance hypothesis	99
4.5: Physiological Causes of Heterosis	100
4.6: Types of Heterosis	100
4.7: Important Achievement	101
4.8: Importance of Heterosis	102
4.9: Breeding Methods and Techniques of Heterosis Breeding	102
4.10: Utilizations and Limitations of Heterosis Breeding	103
4.11: Fixation of Heterosis	103
4.12: Factors Affecting Heterosis	104
4.13: Differences between Heterosis and Inbreeding Depression	104
Selected Questions	105
CHAPTER-5 : CROP IMPROVEMENT AND BREEDING	108-132
5.1: Mutation Breeding	108
5.1.1: The procedure of Mutation Breeding	110

5.1.2: Advantages of Mutation Breeding	111
5.1.3: Disadvantages of Mutation Breeding	111
5.1.4: Important Achievements of Mutation Breeding	111
5.2: Polyploidy Breeding	112
5.2.1: Causes of Polyploidy	115
5.2.2: Induction of Polyploidy	115
5.2.3: Effects of Polyploidy	115
5.2.4: Importance of polyploidy in plant breeding	117
5.2.5: Some Artificially Produced Polyploids	117
5.3: Wide hybridization	119
5.3.1: Breeding procedure for wide hybridization	120
5.3.2: Application of the wide cross	121
5.3.4: Techniques adopted for the removal of post-zygotic barriers include	122
5.3.5: Role of wide crosses in crop improvement	122
5.3.6: Important Achievements	122
5.4: Role of Biotechnology in Crop Improvement	122
Selected Questions	127
CHAPTER-6 : BREEDING FOR DISEASE RESISTANCE	133-154
6.1: Plant Disease	133
6.1.1. Disease Resistance	133
6.1.2: Mechanism of Disease Development	134
6.1.3: Causes of disease resistance	135
6.1.4: Endemic, Epidemic, Pandemic and Sporadic disease	136
6.2: Method of Breeding for Disease Resistance	136
6.2.1: Selection for disease resistance	137
6.2.2: Plant introduction for disease resistance	138
6.2.3: Hybridization for disease resistance	139
6.2.4: Mutation Breeding	143
6.2.5: Role of Genetic Engineering in disease resistance in plants	145
6.2.6: Tissue Culture for disease resistance	149
6.2.7: Wide cross for disease resistance	149
6.2.8: Polyploidy in disease resistance	151
Selected Questions	152
CHAPTER-7 : TISSUE CULTURE FOR CROP IMPROVEMENT	155-174
7.1: Tissue Culture	155
7.2: A brief History of Plant Tissue Culture	156
7.3: Classification of Tissue Culture	156
7.4: Some Important Terminologies	156
7.5: Requirements of Plant Tissue Culture	157
7.6: General Technique of Plant Tissue Culture	157
7.7: Applications of Plant Tissue Culture in Crop Improvement	161
7.8: The tissue culture techniques for crop improvement	161

7.8.1: Micropropagation	161
7.8.2: Morphogenesis	162
7.8.3: Meristem culture or shoot tip culture	162
7.8.4: Haploid culture	164
7.8.5: Embryo culture	164
7.8.6: Somaclonal variation	164
7.8.7: Protoplast fusion for somatic hybridization	165
7.8.8: Culture of genetically engineered cells to produce transgenic plants	166
7.9. Germplasm Conservation	167
7.9.1. Importance of Germplasm	170
Selected Questions	171
PRACTICAL	175-215
Practical 1: Plant breeders kit	177
Practical 2: The floral structure of self-pollinated crops	181
Practical 3: The floral structure of cross-pollinated crops	185
Practical 4: Selection and preparation of parent plants for hybridization	188
Practical 5: Hybridization technique	189
Practical 6: Emasculation in self-pollinated crops	191
Practical 7: Emasculation in cross-pollinated crops	193
Practical 8: Emasculation	194
Practical 9: Emasculation	197
Practical 10: Pollen germination	199
Practical 11: Pollen viability	200
Practical 12: Heterosis	201
Practical 13: Inbreeding depression	203
Practice Questions for Viva-Voce with Answers	204
Some Important High Yielding Varieties (HYVs)	208
Glossary	210
Selected Bibliography	215
