

PAGE CONTENTS

Cartesian Tensor AnalysisPage 1-31

1.1. Scalars, Vectors and Tensors:	1
1.2. Index Notation and Cartesian Summation Convention	3
Solved Examples	3
1.3. Kronecker Delta and Permutation Symbol	4
Solved Examples	5
1.4. Cartesian Coordinates and Rotation of Axes	8
Solved Examples	12
1.5. Law of Transformation of Base Vectors.....	13
1.6 Algebra of Vectors.....	14
1.7. Second Order Tensors	16
Solve Examples.....	17
1.8. Algebra of Cartesian Tensors :	23
Solved Examples	25
1.9. Principal Axes of Second Order Tensors :	26
Solved Examples	28
Exercise	30
Answers.....	31

Cartesian Tensor Calculus.....Page 32-40

2.1. Partial Derivatives of Scalar and Vector Fields, Gradient, Divergence and Curl	32
Solved Example	35
2.2 Gauss's, Stokes' and Green's Theorems in Index Notation	38
Exercise.....	40
Answers	40

Rectilinear and Curvilinear Coordinate SystemPage 41-67

3.1. Rectilinear Coordinate System or Oblique Cartesian Coordinate System.....	41
Solved Examples.....	44

3.2. The Reciprocal Basis	46
3.3. Derivation of Formula for Determining Reciprocal Basis.....	47
Solved Example	50
3.4 Curvilinear Coordinate Systems	54
3.5 Proper Transformation	57
Solved Examples.....	59
3.6 Basis and Reciprocal Basis in Curvilinear Coordinate Systems	60
Solved Example	63
Exercise.....	66
Answer.....	67

General Tensor and the Metric Tensors Page 68-108

4.1. General Tensors	68
Solved Example	71
4.2. The Metric Tensor	76
4.3. The Permutation Tensors.....	88
Isotropic Tensors.....	91
4.4. Tensor Algebra.....	91
Solved Examples.....	92
4.5 The Quotient Rule	94
4.6. Physical Components of a Vector in Curvilinear Coordinate System	95
Solved Examples.....	98
4.7. Scalar Product, Vector Product and Scalar Triple Product in Various Forms.....	101
4.8. Dot Product or Scalar Product of Two Vectors.....	101
4.9. Cross Product or Vector Product of Two Vectors	103
4.10. Scalar Triple Product	103
4.11. Magnitude of a Vector	104
4.12. Angle Between Two Vectors.....	104
Exercise 4.....	106
Answer.....	107

General Tensor and the Metric TensorsPage 109-152

5.1. Partial Derivative of a Vector	109
5.2. Christoffel Symbols	110
5.3. Christoffel Symbols in Terms of Derivatives of Metric Tensors	115
5.4. Christoffel Symbols in Orthogonal Coordinate Systems	116
Solved Examples	118
5.5. Transformation of Christoffel Symbols	124
5.6. Covariant Derivative of Contravariant Components of a Vector	127
5.7. Covariant Derivative of Covariant Components of a Vector	128
5.8. Covariant Derivative of Contravariant Components of a Second Order Tensor.....	128
5.9. Covariant Derivative of Covariant Components of a Second-Order Tensor	129
5.10. Covariant Derivative of Mixed Components of a Second-Order Tensor.....	130
Covariant Derivative of a Scalar.....	131
5.11. Laws of Covariant Differentiation	131
Solved Examples	132
Second Covariant Derivative of Contravariant Components of a Vector.....	134
5.12. Ricci's Theorem	136
5.13. Gradient of a Scalar Field.....	137
5.14. Divergence of a Vector Field.....	138
Solved Examples	139
5.15. Curl of a Vector Field	141
5.16. Laplacian of a Scalar Field	143
5.17. Laplacian of a Vector Field.....	144
5.18. Intrinsic Derivative.....	146
Solved Example	148
Exercise.....	150
Answers	151

Application of Tensors in Fluid DynamicsPage 153-166

6.1. Equation of Continuity	153
6.2. Expression for Acceleration of a Fluid Particle in Euclidean Space	155
6.3. Expression for the Covariant Derivative of Physical Components of the Velocity Vector.	156
Solved Examples.....	157
6.4. Cauchy's Equation of Motion in Orthogonal Curvilinear- Coordinates.....	158
Solved Examples.....	161
6.5 Some Useful Results of Vector Calculus	162
Solved Examples.....	164
Exercise.....	166
Answers	166
