UNIT-1 : SIGNIFICANCE OF PLANT SYSTEMATICS	15-49
1.1. Taxonomy	15
1.2. Levels of Taxonomy	15
1.3. Classical taxonomy and Modern taxonomy	17
1.3.1. Differences between classical taxonomy and modern taxonomy	17
1.4. Systematics	17
1.4.1. Importance of Plant Systematics	18
1.4.2. Brief History of Plant Systematics	18
1.5. Identification in Taxonomy	19
1.6. Nomenclature	19
1.7. Classification	20
1.7.1. Objectives of Classification	21
1.7.2. Types of Classification Systems	21
1.8. Taxonomic evidence from palynology	21
1.9. Taxonomic evidence from cytology	25
1.10. Taxonomic evidence from Phytochemistry	27
1.11. Molecular data in plant taxonomy	30
1.12. Field inventory	31
1.12.1. Importance of Field Inventories in Taxonomy	33
1.13. Herbarium	33
1.13.1. Importance of Herbaria	36
1.13.2. Major herbaria in India	36
1.13.3. Major herbaria of the World	37
1.13.4. Functions of a herbarium	37
1.14. Botanical Garden	37
1.14.1. Importance of Botanical gardens	38
1.14.2. Famous Botanical Gardens of the World	38
1.14.3. Major Botanical Gardens in India	39
1.14.4. Famous Botanical Gardens of Northeast India	39
1.15. Virtual herbarium	39
1.15.1. Importance of Virtual Herbarium	40
1.15.2. Indian Virtual Herbarium (IVH)	40
1.16. eFlora	41
1.17. Documentation in plant taxonomy	42
1.18. Flora	42
1.19. Monograph	43
1.20. Journals	44
1.21. Taxonomic Key	44
1.21.1. Single Access key	45
1.21.2. Multi Access Key	47
UNIT-2 : TAXONOMIC HIERARCHY	50-58
2.1. Taxonomic Categories	50

2.2. Taxonomic hierarchy	51
2.3. Species concept	53
2.3.1. Taxonomic Species Concept	53
2.3.2. Biological Species Concept	54
2.3.3. Evolutionary species concept	55
2.3.4. Ecological Species Concept	57
2.3.5. Phylogenetic Species Concept	57
2.3.6. Genetic Species Concept	57
UNIT-3 : BOTANICAL NOMENCLATURE	59-69
3.1. Principles of the ICN	60
3.2. Key rules of the ICN	60
3.3. Ranks and names	61
3.3.1. Differences between ranks and names	63
3.4. Typification	63
3.5. Author citation	64
3.6. Valid publication	65
3.7. Rejection of names	65
3.8. Principle of Priority	66
3.9. Names of Hybrids	67
UNIT-4 : SYSTEMS OF CLASSIFICATION	70-94
Contributions of major taxonomists to plant classification	
4.1. Theophrastus (c. 371–287 BCE)	70
4.2. Gaspard Bauhin (1560–1624)	70
4.3. Tournefort	71
4.4. Carolus Linnaeus	71
4.4.1. The outline of Linnaeus's System of Classification	72
4.5. Michel Adanson (1727–1806)	73
4.6. Augustin Pyramus de Candolle (1778–1841)	73
4.6.1. Synopsis of A.P. de Candolle's system of classification	74
4.7. Charles Edwin Bessey (1845–1915)	75
4.7.1. Phylogenetic System of Bessey (Modified Version)	75
4.8. Alfred Barton Rendle (1865–1938)	75
4.9. The natural system of classification	76
4.9.1. The outline of Bentham and Hooker's classification	76
4.10. Phylogenetic system of Classification (Cladistics)	79
4.10.1. Engler and Prantl System of Classification	79
4.10.2. Phylogenetic System of Hutchinson	81
4.10.3. Oswald Tippo's System of Classification (1942)	85
4.10.4. Armen L. Takhtajan's System of Classification (1980)	87
4.10.5. Arthur Cronquist's System of Classification (1981)	88
4.10.6. Angiosperm Phylogeny Group (APG IV) Classification (2016)	91
UNIT-5 : BIOMETRICS, NUMERICAL TAXONOMY, AND CLADISTICS	95-115
5.1. Characters in Taxonomy	95
5.2. Variations in taxonomic characters	98
5.3. Operational Taxonomic Units (OTUs)	99
5.4. Character weighting and coding	100

5.4.1. Character Coding	100
5.4.2. Character Weighting	102
5.5. Cluster analysis in Plant Taxonomy	105
5.6. Principles of Numerical Taxonomy	110
5.7. Phenograms and Cladograms	113
UNIT-6 : PHYLOGENY OF ANGIOSPERMS	116-132
6.1. Terms and Concepts	116
6.2. Primitive and advanced characters in angiosperm phylogeny	117
6.3. Homology and Analogy	118
6.4. Parallelism and Convergence in Evolution	119
6.5. Monophyly	119
6.6. Paraphyly	120
6.7. Polyphyly	121
6.8. Clade	121
6.9. Angiosperms	122
6.9.1. Characteristics of Angiosperms	122
6.9.2. Primitive characters of Angiosperms	122
6.9.3. Advanced Characters of Angiosperms	123
6.10. Origin of Angiosperms	123
6.11. Monophyletic and Polyphyletic origin of Angiosperms	126
6.12. Coevolution of Angiosperms and Animals	126
6.13. Methods of illustrating evolutionary relationships	127
6.13.1. Differences between Phylogenetic Tree and Cladogram	131
UNIT-7 : ANGIOSPERMIC FAMILIES	133-183
Magnoliaceae	133
Brassicaceae (Cruciferae)	137
Fabaceae	139
Asteraceae (Compositae)	146
Solanaceae	153
Acanthaceae	157
Lamiaceae (Mint Family)	160
Euphorbiaceae	164
Orchidaceae	168
Musaceae	171
Zingiberaceae	175
Poaceae	178
UNIT-8 : PRACTICALS	184-216
Experiment-1: Study of reproductive parts of different flowers	184
1. <i>Michelia champaca</i> Linn	185
2. <i>Brassica campestris</i> L	186
3. <i>Petunia alba</i> (Hook.) D. Don	188
4. <i>Datura metel</i> L	189
5. <i>Solanum torvum</i> Sw.	191
6. <i>Justicia gendarussa</i> Burm. f.	192
7. <i>Clitoria ternatea</i> L	194
8. <i>Mimosa pudica</i> L.	195

9. <i>Delonix regia</i> (Bojer ex Hook.) Raf.	197
10. <i>Ageratum conyzoides</i> Linn	198
11. <i>Eclipta alba</i> (L.) Hassk.	100
12. <i>Leucas aspera</i> . (Willd.) Link	101
13. <i>Ocimum sanctum</i> L	203
14. <i>Phyllanthus niruri</i> L	204
15. <i>Musa paradisiaca</i> L	205
16. <i>Oryza sativa</i> L.	207
17. <i>Triticum aestivum</i> L	209
18. <i>Zea mays</i> L	211
Experiment-2: Preparation of herbarium sheets of flowering plants	213
Selected Bibliography	215
