

# BIOFERTILIZERS

## Contents

---

<b>UNIT-I</b>	<b>17-40</b>
1.1. Agriculture: Boon to human civilization	17
1.2. Plant nutrition	19
1.2.1. Definition of plant nutrition	19
1.2.2. Mode of nutrition in plants	20
1.2.2.1. Autotrophic nutrition	21
1.2.2.2. Heterotrophic nutrition	21
1.2.3. Factors influencing plant nutrition	24
1.2.3.1. Environmental Factors	24
1.2.3.2. Soil-Related Factors	26
1.2.3.3. Biological Factors	29
1.2.4. Key Role played by essential elements in plant nutrition	30
1.2.5. Nutrient deficiency symptoms in plants	33
1.2.5.1. Nitrogen deficiency symptoms	33
1.2.5.2. Phosphorous deficiency symptoms	34
1.2.5.3. Potassium deficiency symptoms	34
1.2.5.4. Calcium deficiency symptoms	34
1.2.5.5. Sulphur deficiency symptoms	35
1.2.5.6. Magnesium deficiency symptoms	35
1.2.5.7. Iron deficiency symptoms	35
1.2.5.8. Manganese deficiency symptoms	35
1.2.5.9. Molybdenum deficiency symptoms	36
1.2.5.10. Boron deficiency symptoms	36
1.2.5.11. Copper deficiency symptoms	36
1.2.5.12. Zinc deficiency symptoms	37
1.2.5.13. Chlorine deficiency symptoms	37
<b>UNIT-II</b>	<b>41-95</b>
2.1. Chemical fertilizers and toxicity concerns	41
2.2. Introduction to microbial inoculants	43
2.2.1. Biofertilizers: An eco-friendly and non-chemical alternative for agricultural sustainability	43
2.2.1.1. Plant growth promoting rhizobacteria (PGPRs)	44
2.2.1.1.1. PGPRs: Action mechanisms in agricultural sustenance	48
2.2.1.1.2. PGPR as biofertilizer	49
2.2.2. Diversity of microbial biofertilizers	50
2.2.2.1. Nitrogen fixing Biofertilizers	51
2.2.2.1.1. Discovery, classification and functional attributes of <i>Azotobacter</i> and <i>Azospirillum</i> sp.	52
2.2.2.1.2. Functional abilities of non-symbiotic N <sub>2</sub> fixers	53
2.2.2.1.3. Isolation and mass production of N <sub>2</sub> fixers	55
2.2.2.1.3.1. Isolation of <i>Azotobacter</i> and <i>Azospirillum</i> sp.	55

2.2.2.1.3.2. <i>Rhizobium</i> sp. as prominent symbiotic N <sub>2</sub> fixing microbe	56
2.2.2.1.3.3. Mass Production of N <sub>2</sub> fixers	57
2.2.2.2. Future Prospects in using N <sub>2</sub> fixing microbial inoculants in agriculture	58
2.2.2.3. Phosphate solubilizing Biofertilizers	59
2.2.2.4. Potassium solubilizing Biofertilizers	60
2.2.2.5. Zinc solubilizing biofertilizers	61
2.2.3 Advantages of using microbial Biofertilizers over chemical fertilizers	62
2.2.4. Future Scopes, perspectives and challenges in using microbial biofertilizers in agriculture	63
2.2.5. Potential of microbial inoculants as biocontrol agents	65
2.2.6. Selection and characterization of efficient microbial inoculants for field evaluation	69
2.2.7. Microbial mass production and commercialization	70
2.2.8. Microbial registration, patenting and formulation development	73
2.2.9. Regulatory Guidelines	74
2.3. Actinorhizal symbiosis	76
2.3.1. Frankia and actinorhizal association (Nodular endosymbiosis)	77
2.3.2. Actinorhizal symbiosis: Mechanism of infection and nodule formation	80
2.3.3. Role of <i>Frankia</i> -actinorhizal association in climate-smart agriculture for sustainability	82
2.3.4. <i>Frankia</i> -actinorhizal association and biological nitrogen fixation	85
2.3.5. <i>Frankia</i> -actinorhizal symbiosis and land reclamation	86
2.3.6. Future prospects	90
<b>UNIT-III</b>	<b>96-116</b>
3.1. Cyanobacteria	96
3.1.1. Classification	96
3.1.2. Ecology	99
3.1.3. Habitat	99
3.1.4. Morphology	99
3.1.5. Reproduction	102
3.1.6. Ecological Impact and Human Relevance	103
3.2. <i>Azolla</i> and <i>Anabaena Azollae</i> association	103
3.2.1. Genus <i>Azolla</i>	103
3.2.2. Morphology of the symbiosis	104
3.3. Molecular Mechanism of Nitrogen Fixation	105
3.4. Molecular Regulation of the Symbiotic Relationship	107
3.5. Factors Affecting the Growth of the <i>Azolla</i> and <i>Anabaena Azollae</i> Association	107
3.6. Application potential of blue green algae and <i>Azolla</i> in rice cultivation	110
<b>UNIT-IV</b>	<b>117-147</b>
4.1. A brief Introduction to microbial world	117
4.2. Mycorrhizae: An introduction to beneficial plant-microbe interaction	117
4.3. Types of mycorrhizas	118
4.3.1. Ectomycorrhiza	118
4.3.2. Endomycorrhiza	120
4.3.2.1. Arbuscular-mycorrhizae	120
4.3.2.2. Orchidaceous mycorrhizae	123
4.3.2.3. Ericaceous mycorrhizae	124
4.4. Taxonomy of Arbuscular mycorrhizae	124
4.4.1. Old classification system	126
4.4.2. New classification system	126

4.5. Nutrient and signal exchange in ectomycorrhiza	127
4.6. Mechanism of development of arbuscular mycorrhizae	128
4.7. Nutritional transport in Mycorrhizae	130
4.7.1. Carbon transport in Arbuscular Mycorrhizae	130
4.8. Mycorrhizal symbiosis and plant phosphorus nutrition	130
4.8.1. Phosphate uptake and transport through arbuscular mycorrhizal symbiosis	132
4.8.2. Phosphate uptake and transport during ectomycorrhizal symbiosis	132
4.9. Mycorrhizal Symbiosis in Plant Nitrogen uptake	133
4.9.1. Nitrogen uptake and transport in arbuscular mycorrhizal symbiosis	133
4.9.2. Nitrogen uptake and transport during ectomycorrhizal symbiosis	134
4.9.3. Uptake of other Mineral Elements	135
4.10. The Common Symbiosis Pathway	135
4.11. Isolation, quantification and root colonization of VAM spores	
A laboratory guide and data analysis	136
4.12. Mass production of AM fungi for commercialization	139
4.12.1. Substrate based production system	139
4.12.1.1. Advantages and disadvantages of substrate-based production system	140
4.12.2. Substrate free production system	140
4.12.2.1. Advantages and disadvantages of substrate free production system	140
4.12.3. <i>In-vitro</i> production system	140
4.12.3.1. Advantages and disadvantages of <i>in-vitro</i> production system	141
4.12.3.1.1. Starter Culture	141
4.12.3.1.2. Pot culture	141
4.12.3.1.3. Field culture	142
<b>UNIT-V</b>	<b>148-165</b>
5.1. Organic Farming – Green Manuring and Organic Fertilizers	148
5.1.1. Green Manuring in Organic Farming	148
5.1.2. Organic Fertilizers in Organic Farming	149
5.1.3. Green Manuring and Organic Fertilizers: A Combined Approach	151
5.2. Recycling of Bio-degradable Municipal, Agricultural, and Industrial Wastes	152
5.3. Biocompost Making Methods	153
5.3.1. Aerobic Composting	153
5.3.2. Anaerobic Digestion	154
5.3.3. In-vessel Composting	155
5.3.4. Applications of Biocompost	155
5.4. Vermicomposting	156
5.4.1. Types of Vermicomposting Systems	157
5.4.2. Vermicomposting Materials	158
5.4.3. Methods of vermicomposting	159
5.4.4. Field Application	161
<b>Appendix I</b>	<b>166-167</b>
Photoplate I	166
Photoplate II	166
Photoplate III	167
Photoplate IV	167
